PROJECTS

4D Neural Part Model Aug 2025 - Jul 2026

Advisor: Prof. Angela Dai — Technical University of Munich

lead an on-going project on 4d priors.

POD: A Self-Improving Cycle for 4D Object Understanding Jul 2024 - Mar 2025

Advisor: Prof. Angjoo Kanazawa — University of California, Berkeley

Co-lead POD, a self-improving system that uses prediction, optimization, and distillation to better understand 4D object motion from videos, improving over time with more observations.

Robot See Robot Do — Feb 2024 - Jul 2024

Advisor: Prof. Angjoo Kanazawa — University of California, Berkeley

Contribute to 4D Differentiable Part Models (4D-DPM), an analysis-by-synthesis approach leveraging part-centric feature fields and geometric regularizers for reconstructing 3D motion from monocular videos.

GARField — Apr 2023 - Feb 2024

Advisor: Prof. Angjoo Kanazawa — University of California, Berkeley

Co-lead the development of a novel method called GARField utilizing multi-level masks to build a scale-conditioned affinity field for the 3d hierarchical grouping.
